A

abdominal circumference, ratio to femur length, in intrauterine growth retardation, 727
abscess, and magnetic resonance imaging with fluorine, 141
abstracts from Association of University Radiologists annual meetings, 625, 650
  analysis of, 567
acetylcholine, renal blood flow responses to, 824
acoustic neuroma, magnetic resonance imaging in, 360
adenosine, in mesenteric ischemia, 166
adrenal gland
  incidental nodules in cancer patients (critical review), 881
  multiple studies in aldosteronism, 237
  pheochromocytoma of
    bilateral, with hypertension, 455
    in multiple endocrine neoplasia, 916
air gap technique, in digital subtraction angiography of extracranial carotid arteries, 742
aldosteronism, correlation of multiple studies in, 237
American College of Radiology, imperatives in, 894
amiodarone lung toxicity, 911
Amipaque, *see* metrizamide
anaphylactoid responses to contrast media, etiology of, S79
anatomy instruction, by radiologists, 1008
angiocardiography
  pediatric, iohexol in, S75
  of right ventricular cast volume, 29
angiography
  carotid, digital recordings in, 186
  catheter tip recoil in, 193
  cerebral, iohexol in, S55
  coronary
    contrast-induced blood flow changes in, 246
    and fibrillatory propensity of contrast media, 579
    iohexol in, S72
    peripheral hemodynamic effects of contrast media in, 203
  digital subtraction
    in absolute blood flow measurements, 186; (letters) 554
    air gap technique for extracranial carotid arteries, 742
    cardiac function affecting, 33
    coronary, contrast-induced blood flow changes in, 246
    iohexol in, S58
    in vessel diameter measurements, 510
  femoral, pain in, reactive hyperemia affecting, 293
  microangiography
    in acute renal failure, 961
    of liver metastases, 79
  peripheral, iohexol in, S108
  pulmonary biplane cineangiography, 945
  renal, and responses to acetylcholine and diltiazem, 824
  vertebral, and cardiovascular effects of contrast media, 217
angioplasty
  laser, optimal parameters in, 860
  percutaneous transluminal
    coronary, 333
    and platelet activity, 287
  vasospasm from, 938
Angiovist, *see* diatrizoate
anoxia, hepatic, NMR spectroscopy of, 808
antibodies labeled with gadolinium-DTPA, in magnetic resonance imaging, 693
aorta
  contrast enhancement in computed tomography, 989
  dissection of, and flow evaluation with computed tomography, 682
aortic valvuloplasty, balloon, percutaneous (critical review), 550
aortoenteric fistulas, computed tomography of, 272
arachnoiditis, postmyelography
  after iohexol, S14
  pathogenesis of, 85
  testing for risk of, 472
arthritis (current contents), 763
  collagen-induced, in rats, 324
  and magnetic resonance imaging, with spectroscopy of periarticular inflammatory soft tissue, 813
arthrotomography, double-contrast, of temporomandibular joint (critical review), 426
aspirin, and platelet accumulation at arterial injury site, 287
Association of University Radiologists
  abstracts of annual meetings, 625, 650
    analysis of, 567
  annual meeting, 559
  Gold Medal Award, 555
  memorial award, 560
atherosclerosis
  and interventional cardiac catheterization, 333
  laser angioplasty in, 860
autoradiography, thymidine, of endothelial response to vasoproliferative factor in lymph, 58

B

balloon aortic valvuloplasty, percutaneous (critical review), 550
barium enema, double-contrast (critical review), 760
barium swallow, normal findings in, 717
bias correction, in diagnostic test efficacy studies, 751
bile, sampling for cytology, 177
bile ducts
  carcinoma of, biliary cytology in, 177
  digital radiography of, 956
biliary tract dilatation, postobstruction, time and cholecystectomy affecting, 276
biofeedback, ultrasound, for speech training, 90
biopsy, percutaneous, CT body stereotaxic instrument for, 525
blood
  contrast enhancement in computed tomography, 989
  ultrasonic echoes from erythrocytes in, 521
blood-brain barrier disruption, and contrast enhanced magnetic resonance imaging, 830
blood flow
  cerebral, simultaneous measurements of, 672
  coronary, contrast media affecting, 746
  evaluation with computed tomography, 678
    in aortic dissection, 682
  measurements with digital subtraction angiography, 186; (letters), 554
  myocardial, and magnetic relaxation times in ischemia, 465
  renal
    iothalamate affecting, in diabetic rat, 971
    responses to acetylcholine and diltiazem, 824
blood substitutes, fluorinated, magnetic resonance imaging of, 141, 504
blood vessels
  acute bilateral arterial occlusion, 658
  angioplasty-induced vasospasm, 938
  collateral circulation in coronary artery disease (critical review), 552
  diameter measurements with digital subtraction angiography, 510
  interventional cardiac catheterization in atherosclerosis, 333
  laser angioplasty of, 860
  vasodilators in acute renal failure, 961
  vasoproliferative factor in lymph from ischemic tissue, 58
bone
  double-contrast arthrotomography of temporomandibular joint (critical review), 426
  dual-energy scanned projection radiography in metastatic disease, 983
  femoral neck strength evaluation with dual-energy radiography, 476
  fracture fragment alignment assessment, 222
  low-dose transaxial tomography of femur in childhood, 978
  porous lesions in skull (letters), 230
  spinal density measurements by computed tomography, 306
  uptake of gallium-67 and technetium-99m in fractures, 498
book reviews
  Atlas of Breast Pathology (Linell & Ljungberg), 886
  Coordinated Diagnostic Imaging (Simeone), 885
